(Learning – N5 level)

## PROFILE

I'm an enthusiastic Electronics and Communication Engineering student passionate about Automation, AI/ML, and Web Development. I'm skilled in Java, Python, Selenium, and front-end technologies, and currently building smart automation systems integrating IoT and AI. Open to roles in development, testing, and AI-based projects.

## WORK EXPERIENCE

### AI Chatbot Web App

APR 2025 - PRESENT

Independent Project

- Designed a chatbot interface inspired by ChatGPT with voice input and text-to-speech features.
- Built using simple front-end tools (HTML, CSS, JS) for ease of use.
- Implemented chat history storage using local Storage for better user experience.

### Smart Website Automation using Selenium + AI

Jan - Mar 2025

Internship Project

- Create and manage the marketing budget, ensuring efficient allocation of resources and optimizing ROI.
- Oversee market research to identify emerging trends, customer needs, and competitor strategies.
- Monitor brand consistency across marketing channels and materials.

### Online Bus Ticket Booking System

Oct 2024 - Nov 2024

Mini Project

- Develop and maintain strong relationships with partners, agencies, and vendors to support marketing initiatives.
- Monitor and maintain brand consistency across all marketing channels and materials.

## CERTIFICATIONS

### NPTEL – Introduction to IoT

IIT Kharagpur | 2024

- Scored 79% – earned Elite Certification.

### NPTEL – The Joy of Computing using Python

IIT Madras | 2024

- Scored 63% – earned Elite Certification.
